Introduction to Michigan Incident Crime Reporting (MICR) (We are on top of our game)

The MICR User and Technical Manual provides detailed information on Michigan's crime data collection process and the associated offenses, data elements, warnings, and errors. As the MICR collection process continues to advance, it is our goal to update this manual with each MICR 6-month version release to provide the most current technical and user information.

History of Crime Data Collection

The Michigan Uniform Crime Reporting (UCR) program was instituted in 1959 when the Michigan State Police (MSP) requested that all law enforcement agencies (LEAs) voluntarily submit their crime data to compile a uniform crime report. The enactment of Michigan Public Act 319 of 1968, as amended, spurred the growth of the UCR program; submission of crime data became mandatory.

The UCR program originally collected summary counts of offense and arrest information on all reported crimes. In 1982, the system was redesigned and became known as the Incident Reporting System (IRS) which eventually became the Michigan Incident Crime Reporting (MICR) program. As of 2006, almost all law enforcement agencies in Michigan participate in incident-based reporting.

Overview of MICR

MICR was developed to collect accurate and detailed crime data. The database was originally created, following the FBI's design, to update the current and prior calendar year's data. With the adoption of versioning and implementation of accepting Extensible Markup Language (XML), data is retained and easily updated for any year. Agencies that do not have a records management vendor may directly submit their incidents through the Michigan Criminal Justice Information Network (MiCJIN) MICR Portal application.

Accomplishments

- Transitioned from a Summary collection to an Incident-based collection in 1982
- Moved from a mainframe system to an Oracle database
- Collection of Hate Crime data that continues to expand
- Collection of LEOKA data to assist with officer training
- Transitioned from a file transfer service to requiring XML submissions starting on July 1, 2018
- Implemented Elder Abuse Indicator
- Automation of the full-time law enforcement and employee counts in the MICR application
- Automation of Hate Crime and Cargo Theft verification in the MICR application

Goals

- Receive complete and accurate crime data from all qualifying Michigan agencies
- Increase the timeliness of agency submissions
- Update and automate the testing and certification process
- Validate address information for crime mapping and future dashboards
- Provide and display information that is useful and easy to understand

Testing and Certification

MICR certifies agencies, not RMS vendors. Agencies new to MICR, or those switching vendors, must complete the testing and certification process for quality assurance. After successfully completing the testing process, agencies will receive credentials to submit directly to the MICR XML web service. Please contact your MICR representative when changing your RMS vendor; if we are not aware of this change, your submissions will be rejected.

MICR Application and Reports

Application Benefits

With access to the MiCJIN Portal, agencies can request the MICR application. Depending on assigned permissions, users may view, edit, enter, and/or verify information within the MICR and Agency Tracking tabs.

The MICR tab:

- Enter incidents (Only those without an RMS vendor)
- Generate reports
 - Incidents and Clearances
 - Summary of Offenses
 - Summary of Incidents
 - Agency Crime Statistics
 - Arrested Persons
 - o LEOKA
 - Hate Crime
- Hate Crime and Cargo Theft verifications

The Agency Tracking tab:

- Agency Profile
- Head of Agency and MICR Representative
- Population counts
- Full-time law enforcement employee counts
- County and city/twp code combinations for your ORI

Law Enforcement Officers Killed or Assaulted (LEOKA)

The MICR Unit collects LEOKA data within MICR submissions. If additional information is needed for officer deaths, the FBI will contact the agency directly.

The FBI's criteria for members of a law enforcement agency are:

- Wear/carry a badge and firearm
- Duly sworn, with full arrest powers, member of a law enforcement agency
- Was acting in an official capacity (on or off duty) at the time of assault or death
 - if killed, the death was directly related to the injuries received during the incident

<u>Exception</u> – Individuals acting in law enforcement capacity at the request of a law enforcement agency (meeting the above criteria) that are killed or assaulted while performing that request. For more information on the FBI's criteria and the exception, please visit the <u>FBI website</u>.

Published LEOKA reports include variables of time, location, circumstance, age, sex, race, and weapon used. MICR does not collect names or addresses; accurate data is crucial for officer training.

K9: The MICR Unit understands the importance and hard work of each K9. As K9s would not meet the FBI criteria stated above, they cannot be listed with a Victim Type of Police Officer. Therefore, assaults and/or deaths of a K9 should be classified as 72000 – Animal Cruelty.

Yearly collections of LEOKA data can be found at:

- Michigan: MSP (michigan.gov) within the annual report
- FBI: https://crime-data-explorer.app.cloud.gov/pages/home

Hate Crime

Each incident submitted to MICR includes a mandatory entry for "Suspected Bias Motivation". An entry, other than none, should be entered when the action was in whole or in part motivated by hate bias. These entries are utilized to create the state's hate crime data which is then forwarded to the FBI for inclusion in their annual publication. All incidents should be updated as bias is discovered or determined not to exist. The following should be taken into consideration when entering a bias:

- Offender is of different racial, religious, ethnic/national origin, sexual orientation, or gender group than the victim
- Bias related comments, written statements, or gestures made by the offender
- Bias related drawings, markings, symbols, or graffiti left at the crime scene
- Objects or items used or left indicating bias (white hooded robes, burning cross)
- Victim membership of organized racial, religious, ethnic/national origin, sexual orientation, or gender group and offenders are not a member of that organization
- · Incident location where previous hate crime occurred
- Multiple incidents occurred; all victims targeted for the same bias

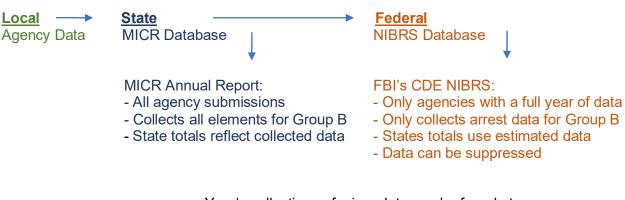

Yearly collections of hate crime data can be found at:

- Michigan: MSP (michigan.gov) within the annual report
- FBI: https://crime-data-explorer.app.cloud.gov/pages/home

Only incidents that have passed the validation process will be saved in the database, included in reports, reflected in year-end statistics, and forwarded to the FBI. If you need access to the MiCJIN portal, you may contact the MICR Unit for more information.

MICR and FBI's NIBRS Data - "Do the numbers match?"

One reason for differences between the agency, state and federal datasets are outstanding errors. For example, the dataset at the agency level will not match the state's dataset if outstanding MICR errors are not corrected and resubmitted. The state's data set will not match the federal dataset if outstanding NIBRS errors are not corrected. In recent years, there have been no outstanding NIBRS errors. Starting with the 2021 data collection, the state can now download the federal collection (for their state's submissions) and compare to validate; this new process will allow the state and federal data collections to better align at the agency level. However, state totals in MICR and NIBRS will differ; while MICR publishes all received data, the FBI uses an estimation process on the state level for agency's that did not submit a full and complete year of data. The FBI may also suppress certain data elements if there is a concern with accuracy.

Yearly collections of crime data can be found at:

Michigan: <u>Michigan Incident Crime Reporting</u>

• FBI: <u>CDE :: Crime (cloud.gov)</u>

Another difference in crime counts may be due to how the offense is collected. MICR collects more specific offenses than NIBRS. For example, Carjacking is a form of Robbery; while MICR collects these offenses separately, NIBRS collects both as Robbery. Further, MICR collects and reports on all Group B offenses while NIBRS only collects Group B offenses that have arrests.

Group A and Group B Offenses

More Info

The FBI collects offense file classes in two groups. Group A is considered a more serious crime while Group B is less serious. MICR collects the same data elements on Group A and Group B; NIBRS only collects arrest data for Group B. Each group has different programming requirements. For example, Group A offenses accept both Group A and B arrest charge codes, while Group B will only accept Group B arrest charge codes.

Note: Since MICR only accepts four offenses per incident, guidance on submissions containing 5 or more offenses can be found in Section 3.1; Group A Offenses, Group B Offenses, Arrest Charge Codes, and Hierarchy of Offenses.

Counting Methodology

Historically, the FBI has incorporated a hierarchy when displaying crime counts in their summary system. With their 2021 update to only collect and publish incident-based data, the FBI can now publish data without hierarchy, or display a combination of both. It is crucial to understand the counting methodology used between data collections to better understand how the same information can be displayed in multiple ways.

Non-Reportable Offenses

MICR does not collect non-criminal traffic related offenses or moving violations. However, MICR and NIBRS both collect offenses involving a motor vehicle that rise to a criminal level due to recklessness, negligence, and/or drugs and alcohol. These offenses include <u>54001</u> – Hit and Run (of a person) Motor Vehicle Accident, <u>54002</u> – OUIL or OUID, and certain arrest charge codes under <u>09002</u> and <u>09003</u>.

MICR Offenses no longer collected by the FBI

Offense Retired	NIBRS Code	Arrest Charge	Date Retired by FBI
Juvenile Runaway	901	Runaway (7070)	December 2008
Fraud, Bad Check	90A	Non-Sufficient Funds Checks (2606)No-Account Check (2676)Uttering and Publishing Check (2693)	December 2020
Peeping Tom	90H	Peeping Tom 3611	December 2020
Drunkenness	90E	Drunkenness (all criminal) 4299	December 2020

The above offenses are all Group B offenses and therefore will only be sent to NIBRS with arrest. If one of the above arrest charge codes is submitted to MICR, if will be sent to NIBRS as a 90Z "All Other" criminal offense.

Crime Counts: Jurisdiction and City/Twp Code Usage

A basic tenet of Uniform Crime Reporting (UCR) is to accurately depict the nature and extent of crime in a particular community. According to Federal Bureau of Investigation (FBI) UCR guidelines, investigations conducted into crimes that occurred outside the investigating agency's jurisdiction, should be relayed to the agency with the most local jurisdiction for reporting whenever possible. It is important that agencies understand how reporting incidents that happen outside of their jurisdiction affects crime counts published by the Michigan Incident Crime Reporting Unit (MICR) and by the FBI.

Crime counts published by the FBI in their Crime Data Explorer, and in other national reports, are calculated and displayed according to the ORI that covers a particular jurisdiction. These reports do not consider the actual city/township code that was reported to MICR for each incident. For example, if a local police department takes a complaint on a university campus who has their own police department, in statistical reports the FBI will attribute that crime to the local police department's jurisdiction and will not attribute that crime to the university. Similarly, if a university police department takes a complaint off of campus in the local police department's jurisdiction, the FBI will attribute that crime to the university and not to the local police department's jurisdiction. This is the case for any local or county agency that reports a crime outside of their local jurisdiction. The FBI will attribute those crimes to the primary city, university, or county for that agency, not the actual city/township/university where the crime occurred.

On the other hand, MICR publishes crime counts for both ORI and by county and city/township codes in separate reports. By reviewing MICR reports, you can determine the activity of each law enforcement agency counted by ORI or the actual crimes that occurred in a particular geographic location based on county and city/township codes.

Agencies should continue to report crimes for which they are the primary investigators and should continue to utilize accurate city/township codes to describe the geographic locations where those crimes take place. Agencies should be aware, however, that the crime counts published by the FBI, by ORI, will differ from the crime counts MICR publishes by city/township code as outlined above. It is important that an agreement be in place with any jurisdiction that an agency is operating in, outside of their own jurisdiction, and that both agencies are aware of the impact this has on statistical reporting.

For a complete explanation of the FBI's jurisdictional guidelines, please see Section 1.4 of the National Incident-Based Reporting System User Manual (https://www.fbi.gov/file-repository/ucr/ucr-2019-1-nibrs-user-manua-093020.pdf/view).

Defining an Incident: Single vs. Multiple

A single incident is defined as one or more offenses committed by the same offender, or group of offenders, acting in concert at the same time and place.

Acting in Concert

Acting in concert requires all offenders be aware of, and consent to, committing or assisting in the offense(s). If an offender is non-consenting, their actions must assist in the commission of the offense(s). All offenders in an incident must have committed all offenses. If one or more of the offenders did not act in concert, more than one incident is required.

Three women threw rocks at a homeless man leaving welts on his body. One woman left. The remaining two women decide to take the man's wallet. One incident will reflect three offenders with the offense of Aggravated Assault. A second incident will reflect two offenders with the offense of Robbery.

Concept of Time and Place

Multiple crimes may be reported in one incident if committed by the same person, or group of persons acting in concert, when the time and space intervals separating the crimes are insignificant. The offense(s) must have occurred during an unbroken duration of time and must have occurred at the same or adjoining location(s).

A man walks down a street and smashes five car windows with a baseball bat. After breaking the last window, he reaches inside the car, grabs a purse, and runs. One incident will reflect the damage to property and theft from motor vehicle. Five victims will be connected to the damage to property, and one victim will be connected to both offenses.

Justifiable Homicide: A Separate Incident

Justifiable Homicide is not a criminal offense; however, MICR collects this information for statistical and other purposes including officer safety training. This offense always occurs with another offense and therefore is always two separate incidents. The first incident reflects the crime the offender was attempting/committing, and the second incident reflects the justifiable homicide.

A man shoots at a police officer. The officer returns fire killing the man. The offense of Aggravated Assault is one incident reflecting the man as the offender and the officer as the victim; appropriate LEOKA fields must be completed. The offense of justifiable homicide is a second incident reflecting the officer committing the justifiable homicide and the man as the victim.

When Victims are Offenders

With the example of a bar fight, and no evidence of all parties acting in concert, multiple incidents are often created when several participants are both victims and offenders. When all participants do act in concert, Victim to Offender Relationship code "31" (Victim was Offender) may be utilized to submit one incident. This data element may assist agencies condensing multiple incidents into one. Remember, all offenders listed in an incident must have committed all offenses.

Updating Incidents

Portal users can make immediate changes via the MICR web application. Incidents determined unfounded after submission to the MICR database must be deleted. RMS vendors should automatically send deletes and updates to MICR. If needed, please contact your MICR representative to verify unfounded incidents have been deleted and/or updates are properly captured.

Assaults Resulting in Death

Agencies should update the assault offense to a homicide offense and resubmit the incident.

No MICR Reportable Data

Agencies with no MICR reportable incidents, within any given month, must submit a "Zero-Incident/No Criminal Data" record. This submission notifies the MICR Unit that no criminal activity occurred for the specified month. Submission of the Zero-Incident/No Criminal Data record will prevent notification of delinquent reporting and assists with completing yearly reporting requirements. If a Zero-Incident/No Criminal Data record is submitted to MICR and later a criminal incident is submitted, the user will receive an error. The Zero-Incident/No Criminal Data record must first be deleted before the criminal incident can be accepted into the MICR database.

Arrests - Clearing Incidents

An incident can only be cleared by arrest or exceptional clearance.

Multiple Arrest Indicator

When an offender is listed on multiple incidents within the same ORI jurisdiction, the one arrest will clear all incidents. The MICR arrested persons report reflects how many times a person is physically arrested/summons, not the number of incidents they are involved in.

Multiple Incidents: A man is arrested for drug possession. Once identified, his name is connected to three previous incidents of robbery, burglary, and arson under the same ORI. The arrest of drug possession will clear the drug charge as well as the other three incidents.

<u>Coding</u>: Using Code C-Count Arrest in the drug incident will clear the incident. Using Code M-Multiple in the other three incidents will also clear the incidents but will not count the arrestee more than once.

<u>Without Multiple Incidents</u>: A man is arrested for robbery. Once identified, his name is not connected with any active cases under the same ORI. The arrest of the robbery will clear the incident.

<u>Coding</u>: Using Code N-Not Applicable will clear the incident and alert MICR that the arrestee is not associated with any other incident.

Exceptional Clearance

The following four conditions must be met to exceptionally clear an incident:

- 1. The identity of at least one offender is clearly and definitively established
- 2. Sufficient probable cause supports the arrest, charging, and prosecution of the offender
- 3. Exact location of offender is known allowing an arrest to made
- 4. Reason outside the control of law enforcement prevents the arrest

With the above criteria met, MICR collects the following exceptional clearance types:

- Death of offender
- Prosecution declined by the prosecutor, for a reason other than lack of probable cause
- In Custody of Other Jurisdiction (includes extradition denied)
- Victim refused to cooperate (in the prosecution)
- Juvenile/no custody (the handling of a juvenile without taking him/her into custody, but rather by oral or written notice given to the parents or legal guardian in a case involving a minor offense)

Hotel Rule

The Hotel Rule is applied when a hotel/motel or storage/rental facility is burglarized. The "Premises 3003Entered" field reflects the number of premises (aka number of hotel/motel rooms or storage/rental units) involved in the incident.

✓ Example

<u>Hotel/Motel</u>: A hotel is burglarized; seven rooms were entered by force. One incident report will reflect the burglary of seven rooms (7 premises entered) and one victim, the hotel business. The individuals staying at the hotel are not listed as victims; they are transient, and the hotel manager will most likely report the crime.

✓ Example

<u>Storage Unit</u>: A storage facility was broken into, and items were missing from ten different rented units. Each renter alerts the storage facility manager of the missing items. The manager contacts law enforcement. One incident report will reflect one burglary of ten units (10 premises entered) with the victim listed as the storage facility business.

✓ Example

<u>Renting a Room</u>: Four couples are renting four different rooms in the same Airbnb house. The house is burglarized, and items were missing from all four rooms. Because the home is being used for temporary housing (hotel), one incident should be submitted reflecting the burglary of four units (4 premises entered) with the location site of hotel and the homeowner listed as the victim

Cargo Theft

The Cargo Theft Indicator is required with one or more of the following offenses:

C 12000 – Robbery	© 26001 – Fraud, False Pretenses
12001 – Carjacking	26002 – Fraud, Credit Card/ATM

24001 – Motor Vehicle Theft	30003 – Retail Fraud, Refund/Exchange
24003 – Motor Vehicle Fraud	C 51000 – Bribery
	-

The national UCR program defines Cargo Theft as "the criminal taking of any cargo including, but not limited to, goods, chattels, money, or baggage that constitutes, in whole or in part, a **commercial shipment** of freight **moving in commerce**, from any pipeline system, railroad car, motor truck, or other vehicle, or from any tank or storage facility, station house, platform, or depot, or from any vessel or wharf, or from any aircraft, air terminal, airport, aircraft terminal or air freight station, warehouse, freight distribution facility, or freight consolidation facility. For purposes of this definition, cargo shall be deemed as moving in commerce at all points between the point of origin and the final destination, regardless of any temporary stop while awaiting transshipment or otherwise."

Cargo theft does not include:

- Larceny of merchandise from a convenience store
- Burglary of a residence with stolen money and household goods
- Burglary of a storage unit with stolen tools
- Completed Burglary with no property stolen
- Fraud with a credit card stolen
- Larceny Other with stolen jewelry and precious metals
- Motor Vehicle Theft (unless a semi-trailer hauling automobiles is stolen in transit)
- Larceny Other with money stolen from a residence
- Larceny from Motor Vehicle with stolen vehicle parts/accessories or wallets
- Embezzlement of money stolen from a business
- Larceny of drugs from a residence
- Theft from a residential porch after box truck delivery

Cargo theft **does** include:

- Box truck delivery driver stops at a truck stop, leaves vehicle, items are stolen
- · Air cargo worker steals shipment scheduled for delivery from an all-cargo aircraft
- Port facility dock worker enters area after hours and steals container of supplies

Creating a MICR Reportable Incident – (Don't be "Offensive")

MICR collects crime data on over 100 Offense File Classes. There are over 65 associated data elements used to collect specific details on each file class. Consistency on *how* offense file classes are chosen is a crucial component to accurate crime statistics. Offenses submitted to MICR are based on the crime that took place, NOT based on judicial prosecution.

Data Elements - (The details)

MICR currently collects 65 data elements for Administrative, Offense, Offender, Victim, Arrest, Property, and Address information within a single incident. Each data element is assigned specific data codes. Accurate and complete RMS coding is crucial to properly translate agency data to MICR. Vendors supplying an RMS to agencies should supply all options to their users. Users not finding data element options provided in this section should contact their RMS and/or MICR representative for clarification.

Refer to the most current programing specifications (also known as the Information Exchange Package Documentation or "IEPD") on the MICR website for updates implemented between MICR User and Technical Manual releases at: https://www.michigan.gov/crs

MICR Errors and Warnings – (Nobody likes these)

Each incident submitted to the MICR database is validated against the MICR schematron. Portal users, entering data through the MICR application's user interface, will view errors as seen in this section. Agencies submitting data via an RMS vendor will view errors based on their system which may, or may not, align with the official error numbers and/or display messages in this section. Warnings and Quarterly Reports – (Better than an error)

Each incident submitted to the MICR database is validated against MICR edits and warnings. Like errors, warnings are immediately returned to Portal users. Warnings will display in the agency's RMS, if programed. These same warnings are available to each agency on a quarterly basis by accessing the MICR website. Incidents that contain warnings, but are free of error, are collected in the MICR database and forwarded to the FBI. Like MICR, the NIBRS system generates warnings and questions many of the same data elements seen in the MICR warnings.

Public Act 319 of 1968

UNIFORM CRIME REPORTING SYSTEM, ACT 319 of 1968

AN ACT to provide a uniform crime reporting system; to provide for the submitting of such report to the department of state police; to require submission of the report by certain police agencies; to require the reporting on wanted persons and stolen vehicles; to require the reporting of information regarding certain persons and unidentified bodies of deceased persons; to prescribe certain powers and duties of law enforcement agencies; and to vest the director of the department of state police with certain authority. **History:** 1968, Act 319, Imd. Eff. July 3, 1968;—Am. 1985, Act 204, Eff. Mar. 1, 1986

28.251 Uniform crime reports; duties of police departments to file, contents.

Sec. 1. The police department of each city or village, any duly constituted police department of a township, and the sheriff's department of each county, once each month upon a date and form prescribed and furnished by the director of the department of state police, shall forward to the department of state police a crime report. Each reporting department shall report only on cases within its jurisdiction and upon which it is making, or has made, the primary police investigation. The report shall be called the uniform crime report and shall cover crimes reported and otherwise processed during the month preceding the month of the report. It shall contain the number and nature of offenses committed, the disposition of such offenses and such other information as the director of state police shall specify relating to the method, frequency, cause and prevention of crime. Under no circumstances shall the name of any person be reported. **History:** 1968, Act 319, Imd. Eff. July 3, 1968.

28.252 Compilation of monthly uniform crime reports; use.

Sec. 2. Upon receipt of the monthly uniform crime reports from the reporting agencies, the department of state police shall prepare a statewide compilation of the statistics contained therein and the resulting statistical compilation shall be available to any governmental law enforcement agency in the state, the judiciary committees of the Michigan state senate and the Michigan state house of representatives, and the federal bureau of investigation, upon request. The statistics made available through the uniform crime report shall be used for the purpose of studying the causes, trends and effects of crime in this state and for intelligence upon which to base a more sound program of crime detection and prevention and the apprehension of criminals. **History:** 1968, Act 319, Imd. Eff. July 3, 1968.

28.253 Voluntary crime reports; inclusion in compilation.

Sec. 3. Any governmental police agency, not falling within the description of those required to submit the monthly uniform crime report set forth in section 1, which desires to submit such a report, shall be furnished with the proper forms by the department of state police. When a report is received by the department of state police from a governmental police agency not required to make such report, the information contained therein shall be included within the monthly compilation provided for in section 2. **History:** 1968, Act 319, Imd. Eff. July 3, 1968.

The chief of police of each city or village and of each township having a police department, and the sheriff of each county within this state, shall report to the department of state police, in a manner prescribed by the department, all persons wanted by, and all vehicles stolen from, their primary police jurisdictions. The report shall be made as soon as is practical after the investigating department either

ascertains that a vehicle is stolen or obtains a warrant for an individual's arrest or determines that they have reasonable grounds to believe that the individual committed a crime. In no case shall this time exceed 12 hours after the reporting agency determines that it has grounds to believe that a vehicle was stolen or that the wanted person should be arrested. **History:** 1968, Act 319, Imd. Eff. July 3, 1968.

28.255 Reports of apprehension or recovery.

Sec. 5. When at any time after making a report required by section 4 it is determined by the reporting agency that a person is no longer wanted because of his apprehension, or any other factor, and when a vehicle reported stolen under section 4 is recovered, the chief of police or sheriff of the reporting agency shall immediately notify the department of state police in a manner prescribed by the department. **History:** 1968, Act 319, Imd. Eff. July 3, 1968.

28.256 Inapplicability of act as to traffic misdemeanors.

Sec. 6. The provisions of this act do not apply to misdemeanor traffic cases or to persons wanted for misdemeanor traffic offenses, or for the violation of any city, village or township ordinance. The provisions of this act shall not be construed to in any way affect existing or future laws and procedures governing the reporting of persons wanted for traffic law violations or for the violation of city, village or township ordinances. **History:** 1968, Act 319, Imd. Eff. July 3, 1968.
